Education

2025 – 2026
Professional Diploma in UX Design
UCD Professional Academy / UX Design Institute

2023 – 2024
MSc in Software Design with Artificial Intelligence
Technological University of the Shannon, Athlone

2016 – 2019
Higher Diploma in Computer Science
Atlantic Technological University, Sligo

2013 – 2015
MA Historical Archives
Maynooth University

2007 – 2011
Doctor of Philosophy (Ph.D.)
Mary Immaculate College, Limerick

2003 – 2007
BA History and English
Mary Immaculate College, Limerick

Portfolio

Analog Devices – CodeFusion Studio User Guide
Developer-facing help content for embedded software tools.
View Documentation

Summary

Technical writer with 9 years of experience delivering developer-focused documentation for complex software products. Experienced in docs-as-code workflows (Markdown, Git, GitHub) and creating clear documentation for APIs, developer tools, and SaaS platforms. Strong technical background with an MSc in Software Design and Artificial Intelligence and hands-on experience working with engineering teams to test pre-release builds, research technical specifications, and ensure documentation accuracy before release. Currently pursuing a Professional Diploma in UX Design and actively integrating AI-assisted tools (Claude Code, GitHub Copilot) to improve documentation workflows and accelerate delivery.

Work Experience

2024-09 – Present

Senior Technical Writer – Embedded Developer Tools

Analog Devices

- **Technical Documentation:** Owned developer-facing content for the open-source embedded tool CodeFusion Studio, including user guides, API references, tutorials, release notes, and video content.
- **Pre-release Testing & Research:** Independently researched technical concepts and product specifications; pulled and tested pre-release builds against documentation in virtual and local environments, ensuring accuracy and identifying issues before release.
- **QA Partnership:** Collaborated with the testing team each release to ensure documentation is accurate and ready to support their test plans.
- **Team Collaboration:** Worked daily with embedded software engineers and cross-functional product teams across Asia, Europe, and the US; gathered technical input directly from developers and authored documentation for a diverse global audience.
- **User Validation:** Conducted user validation with developers to ensure documentation supported real workflows and reduced onboarding friction.
- **Sales and UX Content:** Contributed to customer-facing content, including marketing copy, sales training content, and UX writing.
- **Content Planning:** Used Jira and Jama to plan, scope, and track content requirements for product features and releases.
- **Docs-as-Code Workflow:** Used a docs-as-code workflow (Markdown, GitHub); produced and deployed multiple documentation versions.
- **AI-Assisted Workflows:** Integrated AI tools (Claude Code, GitHub Copilot) into the documentation pipeline for content development, code review, and PR reviews, improving quality and reducing turnaround time.

2022-02 – 2024-08

Technical Writer & Product Owner – SaaS / API Integrations

Oomnitza

- **Documentation:** Built out the complete product documentation suite from scratch, ensuring comprehensive coverage of all features. Created and managed HTML content using MadCap Flare, and managed open-source documentation on GitHub using Markdown in a docs-as-code workflow.

Core Skills

- Cross-functional Collaboration (Product, Engineering, UX)
- AI-Assisted Documentation (Claude Code, GitHub Copilot)
- Developer & API Documentation (REST, Postman, Swagger, cURL)
- Docs-as-Code Workflows (Markdown, GitHub, MkDocs)
- QA & Pre-release Testing (AWS EC2, Docker, Jenkins, GitHub Actions, VMs, Linux, Windows)
- Content Strategy & Auditing
- UX Writing & Content Design (Figma)

- **APIs:** Tested and documented APIs using tools such as Postman, Swagger, and cURL.
- **Style Guide Implementation:** Established and enforced documentation style guide standards.
- **Product Design:** Gathered requirements, designed features in Figma, and created supporting documentation for development and stakeholders.
- **Product Release Leadership:** Led a major product release by coordinating with cross-functional teams, including Senior Product Management, Support, Customer Success, and Engineering.
- **Backlog & Sprint Management:** Managed the product backlog in Jira, facilitated sprint planning sessions, and prioritized user requirements to ensure timely delivery of features.
- **UI/UX Input:** Provided labeling and design suggestions for new features to enhance user experience and interface design.
- **Troubleshooting:** Reproduced software bugs in both Linux and Windows environments and documented workarounds.
- **Portal Maintenance:** Maintained and updated the publishing portal aesthetics using HTML, CSS, JavaScript, and Python.
- **Support:** Managed internal support and customer documentation requests through Zendesk.

2020-03 – 2022-01

Cloud Consultant – EDI Integration

OpenText

- **XML and EDI Development:** Utilised mapping tools and developed C# applications to configure XML documents in compliance with EDI standards.
- **Documentation Management:** Created and maintained implementation instructions, help guides, project design documents, and technical specifications.
- **Customer Support:** Provided ongoing technical support to customers via ServiceNow.
- **Web Development:** Developed and customised customer SupplierWeb portals using HTML, CSS, JavaScript, and SQL.
- **Protocol Configuration:** Configured communication protocols such as OFTP, SFTP, AS2, and HTTP for secure data transmission.
- **Version Control & Project Management:** Managed version control using Git and SVN, and coordinated project activities using Atlassian tools, including Jira (Agile methodologies) and Confluence for documentation.

2017-08 – 2020-02

Technical Writer – Configuration Tools for Embedded Devices

Johnson Controls

- **Metasys® Tools Lead Writer:** Led content creation for Metasys® Tools, progressing from Graduate Technical Writer to Technical Writer III.
- **Content Migration & Process Improvement:** Part of the DITA team responsible for migrating Tech Comms content to DITA/XML across the organisation, improving consistency and streamlining the publishing workflow.
- **Documentation Tools:** Created and managed DITA/XML content using Oxygen, XMetaL, FrameMaker, and Documentum, with version control through SVN and later Ixiasoft CMS.

- Project Management (Jira, Confluence, Zendesk)
- DITA/XML & Structured Authoring (Oxygen, FrameMaker, MadCap Flare)
- Programming (Python, C#, JavaScript, SQL, HTML/CSS)

- **Publishing Portal Maintenance:** Worked with the Web Team to maintain the Fluidtopics publishing portal, assisting in testing, maintenance, and updates using CSS, JavaScript, Python, and SQL.
- **QA Testing:** QA tested software builds and the content that surrounds it.
- **DITA/XML Training:** Delivered training on DITA/XML publishing; tested and troubleshot build and output errors.
- **Peer Support:** Provided peer reviews and support on technical writing tools such as Oxygen, Ixiasoft, Fluidtopics, and SVN.
- **Jira Management:** Developed and managed Jira user stories, ensuring all Definition of Done and Acceptance Criteria were met within sprint cycles.
- **Team Coordination:** Worked closely with international engineering and design teams in an Agile (Scrum and Kanban) environment.
